To protect, restore, assess and improve the health status of Mangaone, Mangaharakeke and Mangaonua Streams

With the support and collaboration of the Tamahere Gully Care Group, Waikato Regional Council, Hamilton City Council, Department of Conservation and other technical support will collectively contribute to protect, restore, assess and improve the health status of Mangaone, Mangaharakeke and Mangaonua Streams.

This project will continue until such time as the wellbeing of these streams are fully restored at a culturally, community and technical science approved state. In the first instance, ngaati haua would like to start on the Mangaone Stream and then proceed to start work at Mangaharakeke and Mangaonua.

This project received funding from the Waikato River Authority (WRA 11-051)
