

### Lewisridge Farms Riparian enhancement

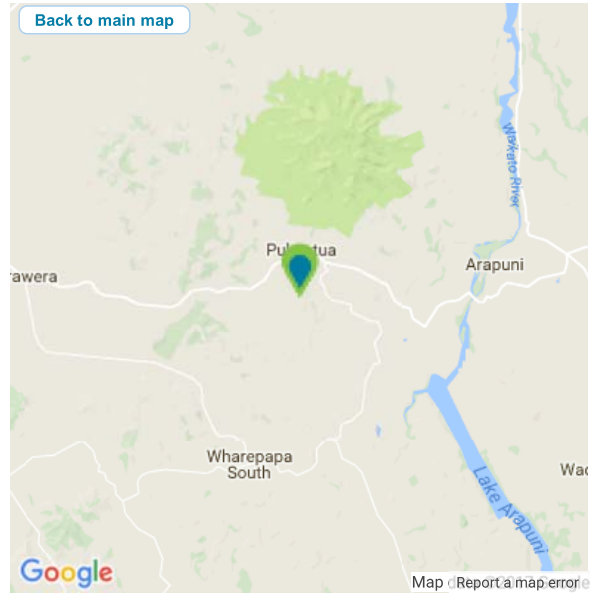

Chris Lewis  
 hi.lewy@xtra.co.nz

An on-farm riparian restoration project in the South Waikato area.

This project being undertaken by Lewisridge Farms Ltd is to restore and protect the farm streams by undertaking riparian planting and fencing work. This project will take 2 years. On a dairy farm, where areas are already fenced off, we will spray back vegetation, prespray in autumn, and plant.

On the drystock farm, we will fence off, put in culverts, put in water system in areas that stock dont have access to, spray back vegetation, and plant. WRA 15-027.
