To restore and protect the Mangakotukutuku Stream

The project is being driven by the Mangakotukutuku Stream Care Group (MSCG), a community group with an interest in restoring the ecological health and quality of the Mangakotukutuku Stream in Hamilton City.

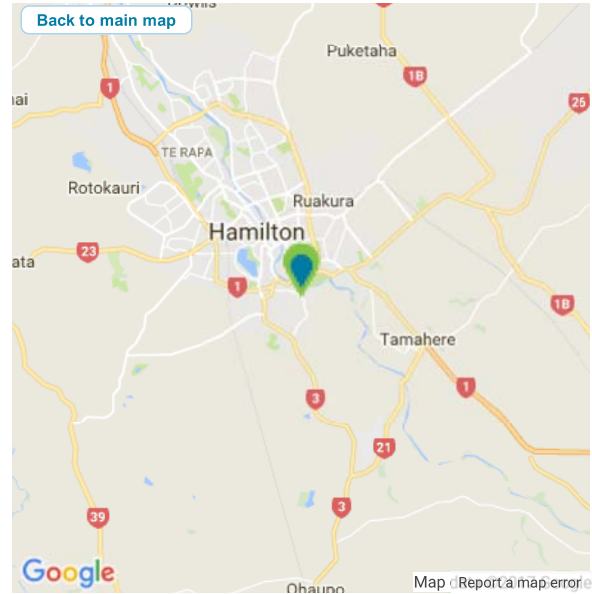

Tonkin & Taylor Ltd (T&T) has had a longstanding association with the MSCG and is supporting the group providing ecological, engineering and contract management services.

The project is supported by the Rangimarie Te Horanganui (RTH) marae which is located next to the Mangakotukutuku Stream upstream of Ohaupo Road.

Hamilton City Council (HCC), as the owner and manager of the various reserve areas along the stream are also an interested party to the project. The principal aim of this project is to showcase what can be achieved with restoration of Waikato River tributaries flowing through urban centres by creating demonstration restoration sites on Mangakotukutuku Stream in Hamilton City.

This project has been funded by the Waikato River Authority (WRA 11-088)
