Development of a restoration plan focused on Ngatamariki Scenic Reserve with consideration of the Lower Orakonui Stream catchment.

Development of a restoration plan focused on Ngatamariki Scenic Reserve with consideration of the Lower Orakonui Stream catchment.

The plan will collate known ecological, geodiversity and cultural information for the site and identify issues and opportunities for restoration activities. Costings will be developed and opportunities explored for integrated management of the catchment both within the reserve and with adjoining landowners and other key stakeholders. It is anticipated this plan will provide the direction and framework for future restoration activities and assist in providing a overarching framework to guide activities and outcomes at this site over the next 10 years and beyond.

This project received funding from the Waikato River Authority (WRA 16-016).
