To provide access to inaccessible parts of the Waikato River through the River Trails

The overarching objective of the Te Awa River Ride is to celebrate the Waikato River by linking community, culture and ecology through active experiences.

The physical trail will be primarily 3m wide, concrete and with a grade one gradient meaning it will be accessible to everyone from experienced cyclists, to people in wheelchairs, parents with prams, toddlers with training wheels and walkers alike. Importantly, access is free.

This project is funded by the Waikato River Authority (WRA 12-015)
