 nigel.bradly@envirostrat.co.nz

The development of a masterplan for the restoration of the Waikato and Waipa River catchments.

This work builds on an existing project (WRA14-004 Waikato-Waipā River Restoration Strategy). The early part of the project mobilised work to develop and test a methodology for prioritisation of future restoration activities in the Waikato and Waipa River Catchments. This continuation of work will see prioritisation of activities throughout the four management units:

1. Completion of final elements of Waipa unit
2. Upper Waikato
3. Central / Lower Waikato
4. Shallow Lakes WRA 14-002.
