————I am supportive of having a long term plan to ensure our rivers are healthy and swimable for future generations

However I struggle to see equity with the Nitrogen Reference Point system,The proposal to reduce the heaviest polluters down to the 75-Th percentile of polluters is very unfaire and only a slap on the rist for the worst offenders while the lowest polluters stay at the present level—We should all have the same limits so we are all contributing equally to the changes required to improve our waterways. Ie if the level is X, then those below X can increase and those above X can decrease,all having the same impact.

I am a Dairy goat farmer and farm our goats on an indoor cut and carry system-The present Overseer program does not cater for our farming system so how can we measure our nutrient losses? Under the present plan I need historical data to establish a NRP Without an accurate tool to establish our properties NRP we would be only guessing ,which could severly disadvantage us if we were to propose a land use change in the future

Is the Tenure of the plan long enough ? Some will need to make significant changes to continue farming, what changes are planned by council going forward that will impact on my bussiness and the decisions i make today.These changes need to be signalled now, as just as my actions will impact the health of our rivers for future generations of NZers the Healthy river requirements will have significant impact on future generations of my farming Family

I SEEK THE FOLLOWING DECISION BY COUNCIL

- #_ Accept the above provision

- Decline the above provision
- If not declined, then amend the above provision as outlined below
