Policy implications of prioritisation

- Why prioritise?
- Prioritising property plans with actions & timeframes
 1. Which places start first
and maybe also
 2. Amount of mitigation action(s) required
- Have we got technical backing for prioritising

1 Understand all sides of issue

Get balanced view

listen to locals, farmers, industry leaders, foresters, recreationalists, environmental groups

2 Develop limits and targets

Work with stakeholders to work out limits and when

use information from step 1 and Technical Alliance

3 Develop options and policy mix

Develop range of policy methods

talk with communities, farmers, foresters, recreationalists and industry to find out what's most likely to work

Policy implications of prioritisation

- We prioritise because of the size of the job ahead and wanting to show progress in the life of this plan change

Policy implications of prioritisation

Prioritising property plans with actions & timeframes

Which places start first

and maybe also

Amount of mitigation action(s) required

Policy implications of prioritisation

- Could prioritise
- which locations have to meet permitted activity conditions /get consent within particular timeframes
- Effort is focused in these areas first

Technical Leaders Group

Weight of evidence for prioritising reductions in non point source contaminant discharges
